

BIOREM ANNOUNCES APPOINTMENT OF NEW PRESIDENT

For Immediate Press Release

Guelph, Ontario, (March 27, 2007). The Board of BIOREM Inc (TSXV:BRM) as part of a succession planning program announces the appointment effective April 2, 2007 of Mr. Peter Bruijns to the position of President and CEO of the corporation and he will join the Board of Directors. Mr. Bruijns succeeds Mr. Brian Herner who led the company through its development years and who has agreed to stay on as a Senior Advisor to BIOREM for the next two years.

“Mr. Bruijns is an experienced executive with a diverse background which will provide BIOREM with the leadership needed to grow the company to the next level” said Robert Nally, Chairman of the Board. “Brian Herner’s leadership during our startup years has given BIOREM an excellent foundation from which to continue to grow” said Nally. Mr. Bruijns has an extensive executive background in sales, marketing, finance, project management, international business development and research & engineering. “The depth of Peter’s skills and experience in these areas is essential to grow a corporation, like BIOREM, whose technologies are leading edge in an emerging industry” said Nally.

“I am impressed with the board of directors and management team that are already in place at the corporation. BIOREM has set an ambitious course and I am excited by the opportunity to lead this growth” said Bruijns.

Mr. Bruijns has a degree in Mechanical Engineering, is a Professional Engineer and earned a MBA from the Ivey School of Business. He has over 15 years of relevant senior management background and offers a strong experience base from which to lead. Mr. Bruijns joins BIOREM from his post as President of the Stiller Centre for Technology Commercialization where he guided numerous biotechnology startup companies in their successful development and gave the center a premier national reputation. Previous to this role, Mr. Bruijns led a pioneering joint venture in Beijing, China in the healthcare field where he was responsible for negotiations, financing, design and construction as well as on the ground operations management of the first private hospital in China. Rounding out his experience were executive leadership roles in construction, sales, manufacturing, design & engineering with companies such as Sutherland-Shultz and Glendale RV.

About BIOREM®

BIOREM® manufactures BIOSORBENS® biofilter media and is a leading supplier of biofilters for air pollution control in municipal and industrial applications, including BIOCUBE® modular units and the recently introduced MYTILUS® biotrickling filters. With over 400 installed systems and over a decade of experience, the Company’s products are the technology of choice for odor control at Wastewater Treatment Plants across North America. www.biorem.biz
